

TRANSCAT SOFTWARE

MAKE YOUR DATA FLOW

XFile V5

Exchange of consistent CATIA V5 data

- Supports data exchange of partners in different PLM environments
- Ensures that the sent container is complete
- Lists addressee embedded and missing files
- Automated integration in data exchange processes possible
- Supported by German car makers and Dassault Systèmes

my V5

Administration and user management for CATIA V5

- Minimal effort to roll out and upgrade CATIA
- Simple configuration of users: Rights / Licenses / Environments / User groups / Development partner
- One configuration file for all platforms (Windows, AIX, etc.)
- Intuitive GUI for users to start CATIA in the right environment

VDAFS for CATIA V5

Bidirectional VDAFS Interface

- Available for all CATIA V5 platforms
- Works for Topologies and Solids
- Modes:
 - Interactive in CATIA
 - GUI for use without CATIA
 - Batch mode

CAVA

CAVA – Solutions for car design and legal compliance in CATIA V5

- CAVA is a suite of products that resulted from a common project with German car makers:
 - CAVA OVA (Overall Vehicle Architecture)
 - CAVA Vision
 - CAVA Safety
 - CAVA Manikin
 - CAVA Wiper

Founded in 1987, Transcat PLM GmbH & Co. KG is a fully-owned subsidiary of Dassault Systèmes. From the very beginning, Transcat PLM has been a solution provider specializing in Dassault Systèmes portfolio and developing add-on software to enhance the productivity of their customers.

Transcat PLM's software solutions support the design process with CATIA, DELMIA and ENOVIA. Companies around the World optimise their processes and enhance their products with products from Transcat PLM. Q-Checker, CAVA, myV5, VDAFS Processor and XFileV5 are helping users in the context of a global development process.

Q-CHECKER

Management system for Product Data Quality

- 1,500 customers in all industries
- Geometric model quality, CAD-Standards and methodology
- Delivery deadlines are met by avoiding late repairs
- Enhanced cooperation between design partners in a world-wide distributed development process

Q-PLM

Q-Checker as an automated part of the PLM process

- Integrations to data exchange and PDMs
- Low implementation effort
- Standard products, such as Q-PLM SmarTeam
- Compatible with coming versions of CATIA and Q-Checker

Q-MONITOR

Establish a continuous improvement process

- Measure data quality in significant process points
- Statistics about most frequent errors and quality improvement
- Evaluation of departments, partners and processes
- Targeted training
